

Tuba Green Energy

## Company Profile

### About us

TGE has been an experienced provider in the development, manufacture and maintenance of innovative power generation, turbines and plant technology since starting with Tuba in 1995. Hydrogen and geothermal energy are also included. The company was founded at that time as TUBA by Mr. Dipl.-Ing. Frank Krämer founded, with headquarters in Germany/Frankfurt am Main. We combine technological innovation with many years of experience to provide tailor-made solutions for industrial and energy-generating applications. Our focus is on efficiency, sustainability and the optimization of operating processes, as well as research and development. Further branches are located in Indonesia, Poland and Ukraine.

### Our Mission

We are committed to strengthening the energy and industrial sectors with future-proof technologies. By using the latest technology and sustainable concepts, we help to increase energy efficiency and minimize environmental impact.

### We deliver

#### Turbine solutions

- Development and production of hydrogen and laser geothermal systems
- Repair and maintenance for all commercially available turbine models
- Retrofit and upgrade services to increase efficiency

#### Plant engineering

- Planning and construction of turnkey systems
- Integration of automation technologies
- Testing and certification according to international standards

## Advice and service

- Technical advice for process optimization
- 24/7 maintenance and repair service
- Training for operators and maintenance personnel

## Our core competencies

Technological expertise: We combine in-depth know-how in the areas of mechanical engineering, fluid mechanics and materials science. Customer-centric approach: Each project is individually planned to meet the specific needs of our customers.

Sustainability: Our solutions are designed to reduce emissions and use resources efficiently.

## References

TGE successfully works with leading companies in the energy supply, petrochemical, metal processing and other industries. Our projects range from the provision of individual turbines to comprehensive system modernizations.

## Career at TGE

We are constantly looking for talented engineers, technicians and professionals who share our passion for innovation and quality. Become part of our team and help shape the future of turbine and plant technology.
